University of Rhode Island Request for Redundant Local Loop

This is a request for a local loop for Internet traffic extending from the Kingston Campus of the University of Rhode Island and terminating at the CIT building at Brown University, 115 Waterman St., Providence, RI. This circuit must be redundant to the university's existing local loop (Verizon circuit # 85HFGL578754) and must be terminated in a mutually agreeable location on the Kingston Campus. The initial request is for 40 MB.

Requirements:

1. The physical path must be totally separate from the path used by the current service provider. This means that from the demarcation university's demarcation point to the provider's equipment the cable must not share the same sheath, conduit or pole space.
2. Hand off must be 100Base-FX (Fast Ethernet) on multi-mode or single-mode fiber.
3. Vendor must provide 7X24X365 phone support for trouble reporting and must have technicians available during the same time period to correct problems. The technicians must be able to respond within four hours of receiving the trouble report.
4. The circuit must be scalable in increments of at least 5 MB up to 100 MB.
5. The successful bidder must own the facilities that will be used to provide this service to the university.
6. Please provide the following pricing information:
